Product information and application use

The Engineered Polymer (EP) Heating Manifold Elbow (A2670090) enables connections to supply and return piping from above or below. Two elbows feature different lengths to accommodate tube spacing for the supply and return lines on a EP Heating Manifold for use in hydronic radiant heating and cooling systems. Use only propylene glycol in radiant systems with EP Heating Manifolds; never use ethylene glycol.

EP Heating Manifold Elbow, set of 2	A2670090	0.34

Installation Related applications

Hand-tighten the elbow to the supply and return on the manifold. For additional information, refer to the instruction sheet. Note: Use only propylene glycol in radiant heating and cooling systems with EP Heating Manifolds; never use ethylene glycol. Refer to the EP Heating Manifold Installation Guide for a complete chemicals list.
