Installation	Related applications
Square cut the Uponor PEX tubing. Remove excess material. Slide the ProPEX ring over the end of the tubing (maximum 1 /16" overhang for rings without stop). Expand the tubing and ring. If using the	PEX-a Plumbing Systems
ProPEX Manual Expander Tool, rotate the tool a quarter turn after each expansion to prevent the	
formation of grooves. Remove the expansion tool and fully seat the tubing and ring against the	
shoulder of the fitting. Make ProPEX connections at temperatures above 5°F/-15°C. For more	

information, refer to the Uponor PEX Piping Systems Design and Installation Guide.

Notes

Degree of crosslinking: 70% to 89%
