| Prop 65 label required? | Yes |

Product information and application use

Smatrix Pulse provides precise wireless control of radiant floor heating as well as forced-air heating and cooling systems in one solution that connects to a smart home assistant and can also be controlled remotely via the Smatrix Pulse App.

The Smatrix Pulse Mini Sensor (T-161) is an operative temperature sensor that provides precise measurement of thermal comfort in an inconspicuous, discreet package. The Mini Sensor connects via wireless technology to the Smatrix Pulse Controller (X-265). The controller can connect up to six (6) thermostats (or mini sensors) and eight (8) actuators. The controller operates the actuators, which, in turn, affect the flow of the supply water to change the indoor temperature using information transmitted from the registered thermostats and system parameters.
