Single family houses

Product systems

Põrandakütte ja -jahutuse süsteem

Aadress

via Pasinetti

Projekti tüüp

Renovation

Partnerid

contractor

Andreoli Costruzioni

specifier

Studio Tecnico dp Perito Industriale

Davide Parisi

installer

Idraulica Napoleoni snc

This "Class A" house is the maximum expression of the words "energy efficiency". Perfect thermal insulation, solar panels, heat pumps and Uponor underfloor heating & cooling system paired up with wireless temperature control are perfectly integrated in the building structure.

Uponor Sales people, engineers and installers worked together to create a comfortable living solution. They started with the ideal thermal insulation, which is a fundamental aspect for a "Class A" building. The green roof grants a pleasant integration with the beautiful natural scenery of the area.

Uponor underfloor heating & cooling is paired up with renewable energy sources, and the ideal temperature is obtained with Uponor wireless control with LCD display.

Mechanical ventilation is also another important aspect of the project. The indoor air is automatically changed every 24 hours. This will reduce the thermal losses due to the frequent opening and closing of windows, and since the air is constantly renewed, it will create a healthy and allergen-free environment.
