Reconstruction of the Gbelána mansion into a 4-star congress hotel with wellness

During the renovation of the mansion, particular emphasis was placed on sanitary pipes that meet the requirements and guidelines for drinking water. And that's why we used our unique composite pipe system to install drinking water distribution. Uponor MLC Uni Pipe Plus, which boasts a seamless aluminum layer. This means that this composite pipe does not have a longitudinal weld and has a different composition and properties than for example Uponor PE-Xa. We deliver composite pipes in rods or coils. The advantage of this system is 100% resistance to oxygen diffusion, easy handling, low weight and, above all, high shape stability and flexibility in bending.
