

K-12 Schools
Solutions

Uponor

Complete polymer piping solutions. One trusted source.

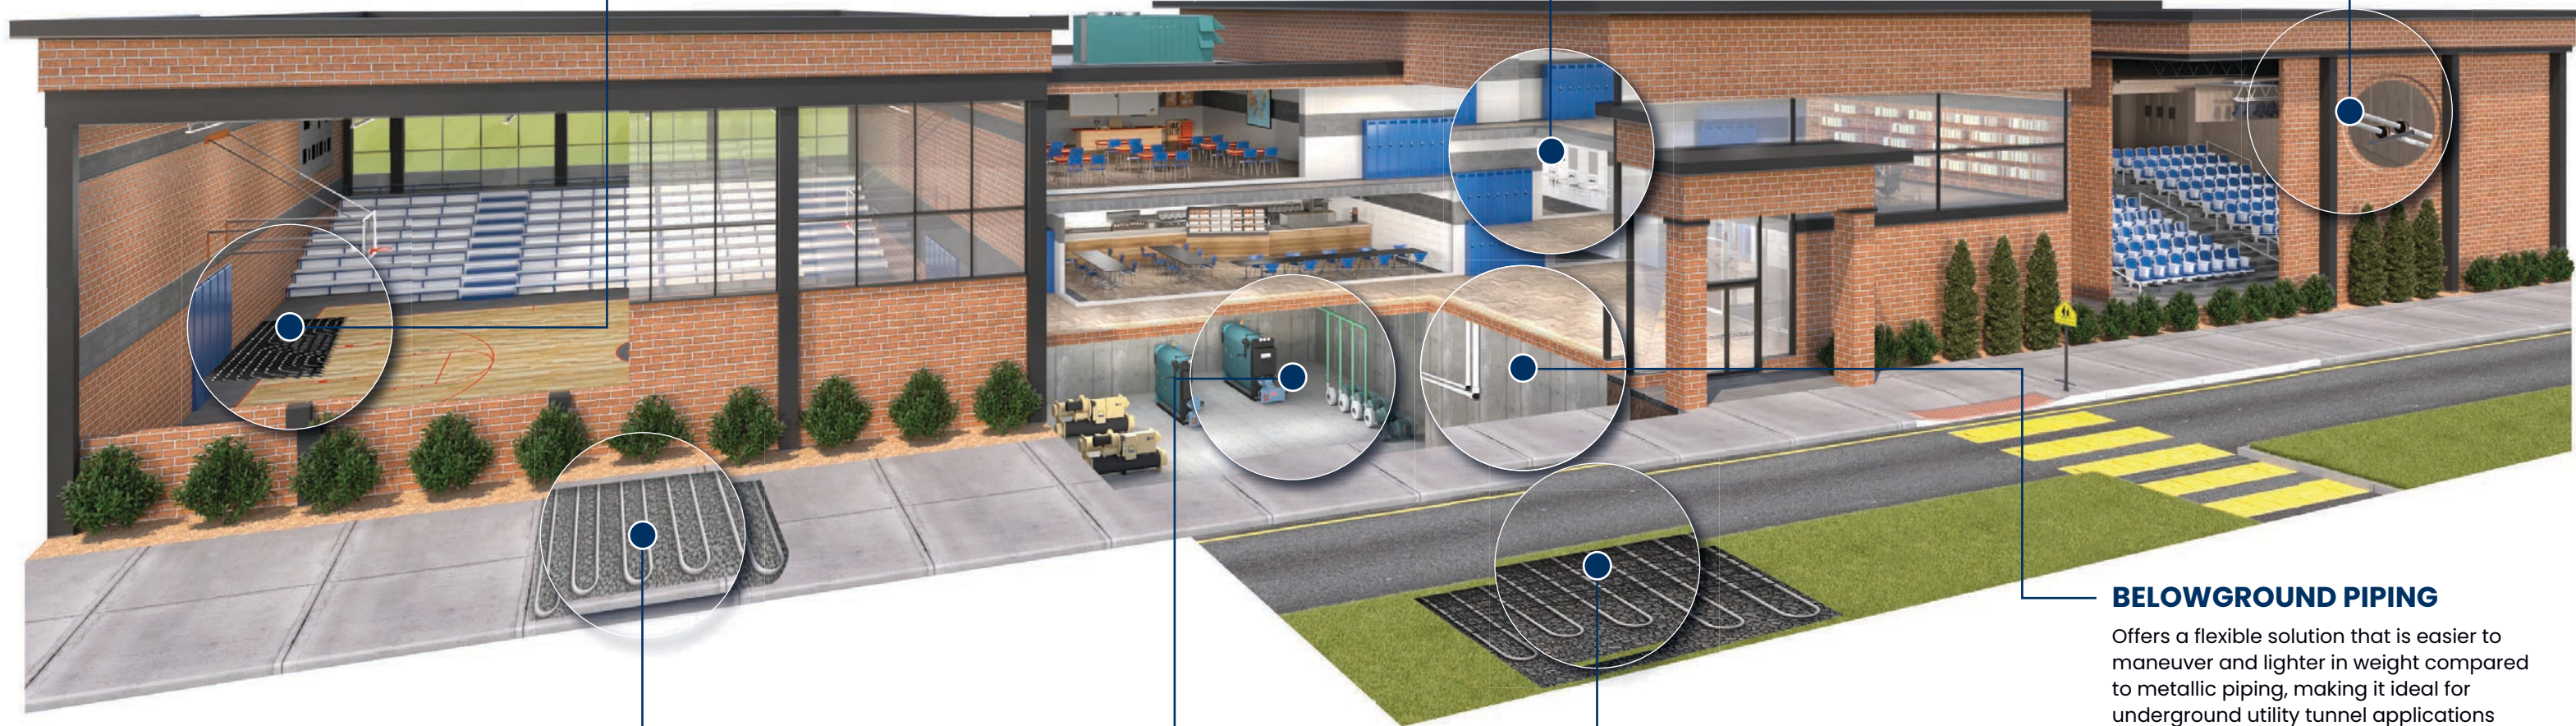

- ✓ Health and safety
- ✓ System longevity
- ✓ Ease of installation and serviceability

RADIANT HEATING AND COOLING

Supplies the most comfortable, energy-efficient method for conditioning a space that also improves the indoor environmental quality (IEQ)

DOMESTIC WATER PIPING

Delivers reliable and hygienic water throughout the building with polymer piping and fitting solutions that resist pitting, scaling, and corrosion

SNOW AND ICE MELT

Protects students and staff from slips and falls and reduces maintenance labor and costs

HYDRONIC PIPING

Maximizes the corrosion-resistant, long-lasting benefits of PEX and PP-RCT for new and retrofit hydronic piping applications

TURF CONDITIONING

Provides durable, reliable underground piping systems for safer, higher-performing athletic fields all year long

BELOWGROUND PIPING

Offers a flexible solution that is easier to maneuver and lighter in weight compared to metallic piping, making it ideal for underground utility tunnel applications

BUILD
confidence into
every project

VERSATILE

Piping solutions that optimize both new construction and retrofit buildings

RELIABLE

Strong connections and durable systems for confident performance

SUSTAINABLE

Designs that maximize efficiencies and minimize product installation waste

SUPPORT

Hands-on, expert support from design to bid to construction

Superior polymer system with technical and design support

With our reputation for delivering proven piping systems, Uponor now offers your K-12 school project a complete polymer solution with sizes up to 3" for PEX and up to 24" for PP-RCT.

In addition to installation ease, product durability and job site safety, Uponor piping systems are supported by our technical and design experts and backed by a 25-year transferable limited warranty on PEX and a 10-year warranty on PP-RCT.

Uponor understands that in schools, every dollar counts. Our strong, long-lasting piping solutions provide maximum system efficiencies while offering easier maintenance over the life of the structure.

How Uponor benefits re-piping and renovation projects

Older structures pose many challenges when it comes to renovating a building. Uponor piping systems provide the lightweight, flexible, durable solution to make installations safer, faster and easier while also providing greater corrosion-resistance for a lifetime of reliable service.

- ▶ Uponor expertise throughout the project delivery process, from design to bid to construction and beyond
- ▶ Long coils of pipe for fewer joints underground or behind walls
- ▶ Less maintenance, greater longevity, better system performance
- ▶ Flexible pipe to limit disruption to existing structures
- ▶ Ease of installation for project efficiencies
- ▶ No dry fits for improved system reliability
