

# Uponor PEX Re-Pipe Advantages

Uponor crosslinked polyethylene (PEX-a) pipe is the flexible, durable, cost-effective solution for re-piping plumbing and hydronic distribution systems.

The proven reliability and performance of an Uponor PEX system ensures longer service life and can help reduce maintenance costs when compared to copper, steel, and CPVC systems.

## System Benefits

- › Less intrusive compared to rigid piping; minimal demo and patchwork
- › Flexible pipe equals fewer connections for faster installs
- › ProPEX® expansion connections cannot be dry-fit, eliminating blow offs and leaks
- › ProPEX fittings offer visual connection with no hot work
- › No cure time with same-day start-up for occupied buildings
- › Stable material costs; not subject to metal value fluctuations
- › Long pipe coils can be cut to length to reduce waste
- › No scrap value eliminates risk of job-site theft

## Proven Performance

- › Highly durable; resists corrosion and pinhole leaks
- › Provides greater resilience in freezing conditions
- › No scale buildup for better water flow
- › Superior water conservation with multiport tees and piping fixture groupings
- › Eliminates water hammer and singing pipes
- › 40 years of reliable service with more than 17 billion feet of pipe installed
- › Confidently backed by a 25-year transferable limited warranty
