

Weholite is the global leader in HDPE structured wall pipe and other applications. The brand is synonymous around the world with quality, durability and flexibility. Weholite products are used extensively in industry within water management, marine applications, ecological heating and cooling, panels, chambers and infra tunnels.

A spirally wound structured-wall pipe, Weholite is extremely light weight and easy to transport and install. Our customers range from major contractors to municipalities and energy companies.

Join the Weholite family

Becoming a Weholite licensee can transform a business. Some of our licensees have Weholite as their main business offering while for others it is complimentary to their core business.

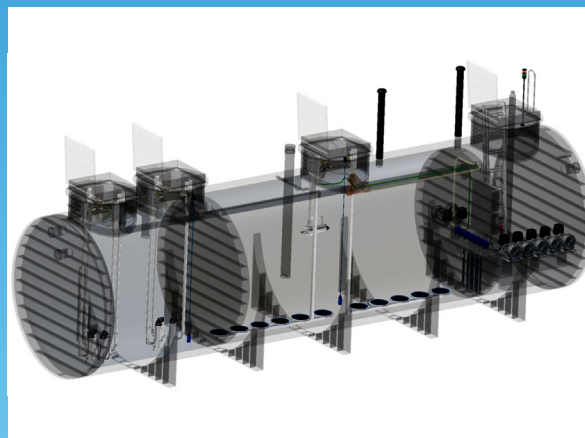

Joining the family provides access to an inclusive network of businesses across the globe that are manufacturing Weholite for a variety of different applications. A culture of knowledge sharing and best practice means new ideas are shared and support is always available.

Weholite Licensing Agreement

The Weholite pipe production line forms the main part of the licensing agreement and along with equipment for the production of Wehopanels, fittings, joints, field jointing and quality control provides a complete production set-up.

Production support from Uponor Infra and other licensees is always available and the licensing agreement includes support with production set-up, personnel training, different applications and access to continuous production development.

As a Weholite licensee you can use the Weholite trademark, references, internal product standards and manuals, calculation software, product development, quality control and marketing material developed by the wider Weholite family.

Business opportunities

The Weholite family meets on a regular basis at seminars and working groups to share ideas, promote business expansion and explore opportunities for joint working. The Weholite concept is a fantastic base for pre-fabrications of all kinds and is open to new product ideas from licensees that require a quality, durable, environmentally friendly and economical solution.

The Technology of Weholite was developed in 1983 and since then has transformed the global pipe market, establishing a network of successful licensees.
