

2" PEX Minimum Cut Length Technical Bulletin

Affected Products

- All 2" Uponor PEX pipe and ProPEX® fittings
- Milwaukee® 2" ProPEX Expander Head (part no. 49-16-2613)
- Milwaukee® M18 FUEL™ ProPEX Expander Tool (part nos. 2932-20 and 2932-22XC)

Issue

Using a minimum pipe cut length of 6" increases the likelihood of damaging the fitting when making a connection with the 2" ProPEX Expander Head (part no. 49-16-2613) on the Milwaukee M18 FUEL ProPEX Expander Tool (part nos. 2932-20 and 2932-22XC).

Corrective Action

Increase the cut length for 2" PEX to 6¾" to avoid possible damage to the fitting. Note that Uponor is updating the minimum cut length in the current manuals and associated documentation.

Note: Using a minimum cut length of 6" is acceptable when using 2" ProPEX Expander Heads (part no. 49-16-2614) on the Milwaukee M18 FORCE LOGIC™ ProPEX Expander Tool (part nos. 2633-20HD and 2633-22HD).
