

The Logic Behind Uponor Logic Plumbing

Trusted by America's top builders and millions of homeowners, Uponor offers best-in-class solutions to build healthier, higher-performing homes.

The most efficient use of materials for the most effective water delivery system, Uponor is the superior PEX system professionals trust.

Uponor PEX Systems

- > Crosslinking of 80%+ compared to 65-70% with PEX-b
- > Engineered polymer (EP) fittings made in the USA
- > Most comprehensive offering of ASTM F1960 fittings
- > Larger ID ProPEX® fittings compared to crimp insert
- > No micro-cracking during expansion
- > Superior freeze-thaw resistance (PPI TR-52)
- > Kink repairable
- > Tightest bend radius
- > Strongest expansion fitting connection

HEALTHIER HOMES

- > Freeze-resistant pipes provide freedom from household mold and water damage.

SUPERIOR DURABILITY

- > The higher crosslinking in Uponor AquaPEX® pipe results in greater flexibility and strength, ensuring no micro-cracking during expansion for fast, stronger connections.

DESIGNED FOR RELIABILITY

- > Highly reliable ProPEX expansion connections cannot be dry fit, eliminating concerns of dry-fit leaks and blow offs.

Less Stagnant Water

Using the Logic installation method shortens the runs to fixtures, while higher-use fixtures continually refresh the water in the main loop.

Safer Drinking Water and Chlorine Resistance

Uponor PEX-a pipe is tested and listed to ASTM F2023, achieving the highest chlorine resistance rating of '5'.

Service and Support

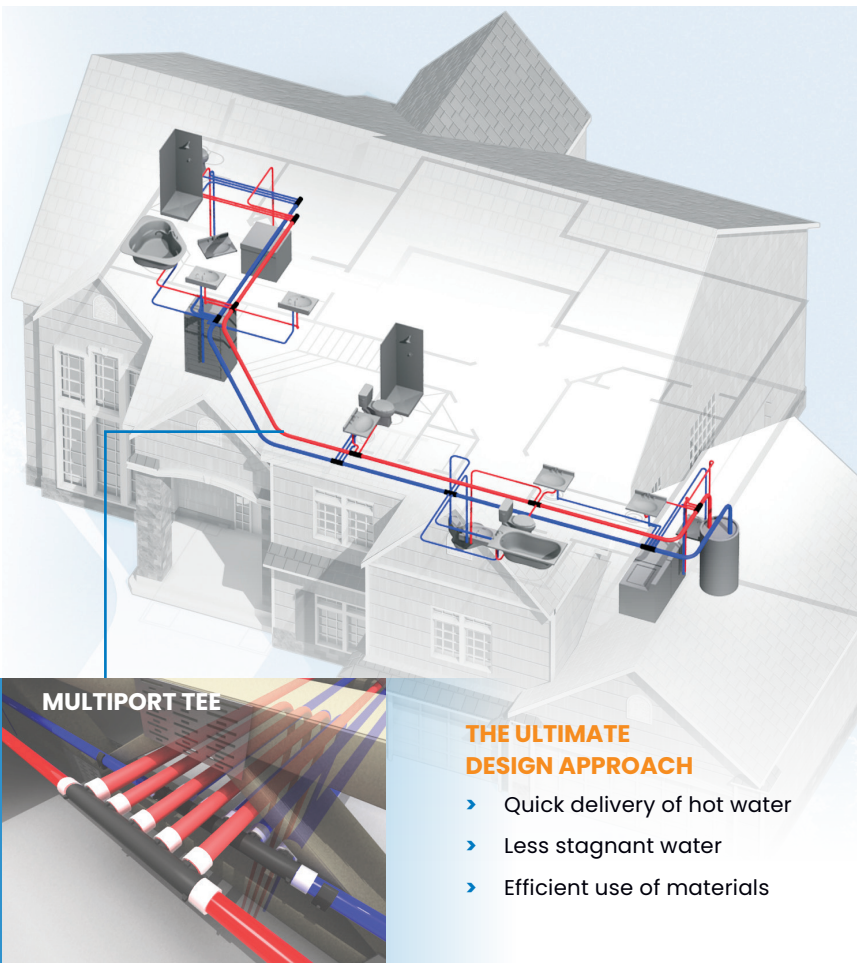

Backed by a 25-year transferable limited warranty with field support, nationwide distribution, and training to help keep your jobs on track, on budget and on time.

► The Logic Behind Uponor Logic Plumbing

Uponor Logic plumbing provides the most efficient use of materials for the most effective water-delivery system for a home.

Maximizing the unique design of the multiport tee, an Uponor Logic layout provides water to all fixtures in a single grouping for system simplicity, routinely refreshed water, and faster hot-water delivery.

This arrangement typically requires fewer fittings than trunk and branch and less pipe compared to homerun systems, maximizing homebuilding productivity.
