

The perfect protection. For heating and domestic water installation.

Uponor Fluvia Safety Sets

Safety in domestic water installations

Uponor Fluvia Safety sets provide an all-in-one solution for the protection of heating or domestic water installation against damage due to overpressure caused by thermal water expansion.

Components like manometer, safety valve and air vent ensure stable system operations and reliable readings. Predesigned connections require low installation effort for integration of the expansion tank.

Uponor Fluvia Safety Sets offer a high level of reliability and protection.

Benefits:

- Low-installation effort
- All-in-one solution
- High-quality
- Fully proved for given application fields
- Highest safety

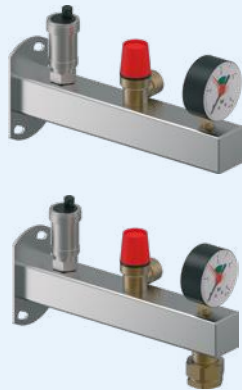

uponor

The Uponor Fluvia Safety Sets are available as:

Safety sets INOX

with

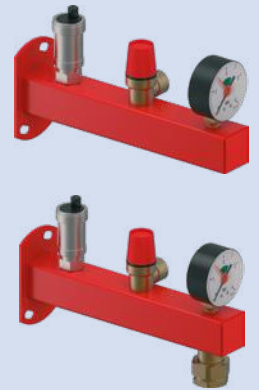

- Manometer
- Safety valve (3 or 6 bar)
- Automatic air vent
- Option: Quick-fix coupling G3/4 for expansion tank

Safety sets powder coated

with

- Manometer
- Safety valve (3 or 6 bar)
- Automatic air vent
- Option: Quick-fix coupling G3/4 for expansion tank

Boiler safety set powder coated

with

- Manometer (4 bar)
- Safety valve (3 bar)
- Automatic air vent
