

Uponor

Build on Uponor with preassembled manifolds

Time and cost-efficient installation with
Uponor Comfort Port

BUILD ON
Uponor 100
YEARS

Install 2xtimes faster with 15% lower costs

Wherever you are using Uponor underfloor heating system, high quality Comfort Port manifolds are the ideal solution for any building type, whether it is single or multi family house, or any commercial building. Uponor Comfort Ports are fully preassembled and pre-wired in the Uponor factory and delivered ready-to-install to the building site. You can choose from large number of configurations or create your own individual specification. As a result, the installation can be done 2xtimes faster and 15% lower installation costs.

**Only 1 fully prefabricated Comfort Port package
instead of 30 individual packages.**

How you benefit:

- Saving installation costs and time on site
- Improved site efficiency due to optimised material flow
- Quality assurance through standardised prefabrication in the factory
- Avoid installation errors on site
- Precise selection of the required components
- Secure price-calculation

2.5 HOURS

TIME SAVING

High-quality components for long-term safety

- 1** On-wall and in-wall cabinets made of galvanised steel sheet, for on-wall-installation with a depth of 140 mm and in-wall installation with depth of 80 or 110 mm.
- 2** Integrated spirit level for easy levelling.
- 3** Preassembled Uponor underfloor heating manifold:
 - Free choice of stainless-steel manifold Uponor Vario S (2-20 loops) or polyamide manifold Uponor Vario M (2-15 loops).
 - Supply with or without flow indicator.
 - Return valves prepared for connection to actuators 230 V or 24V.
- 4** Configurable with Uponor Smatrix room temperature control, wired or wireless-controlled, with Autobalancing function.
- 5** Preassembled power socket.
- 6** Choice of different connection sets (with or without heat meter connection set).
- 7** Pre-wired actuators and controls.

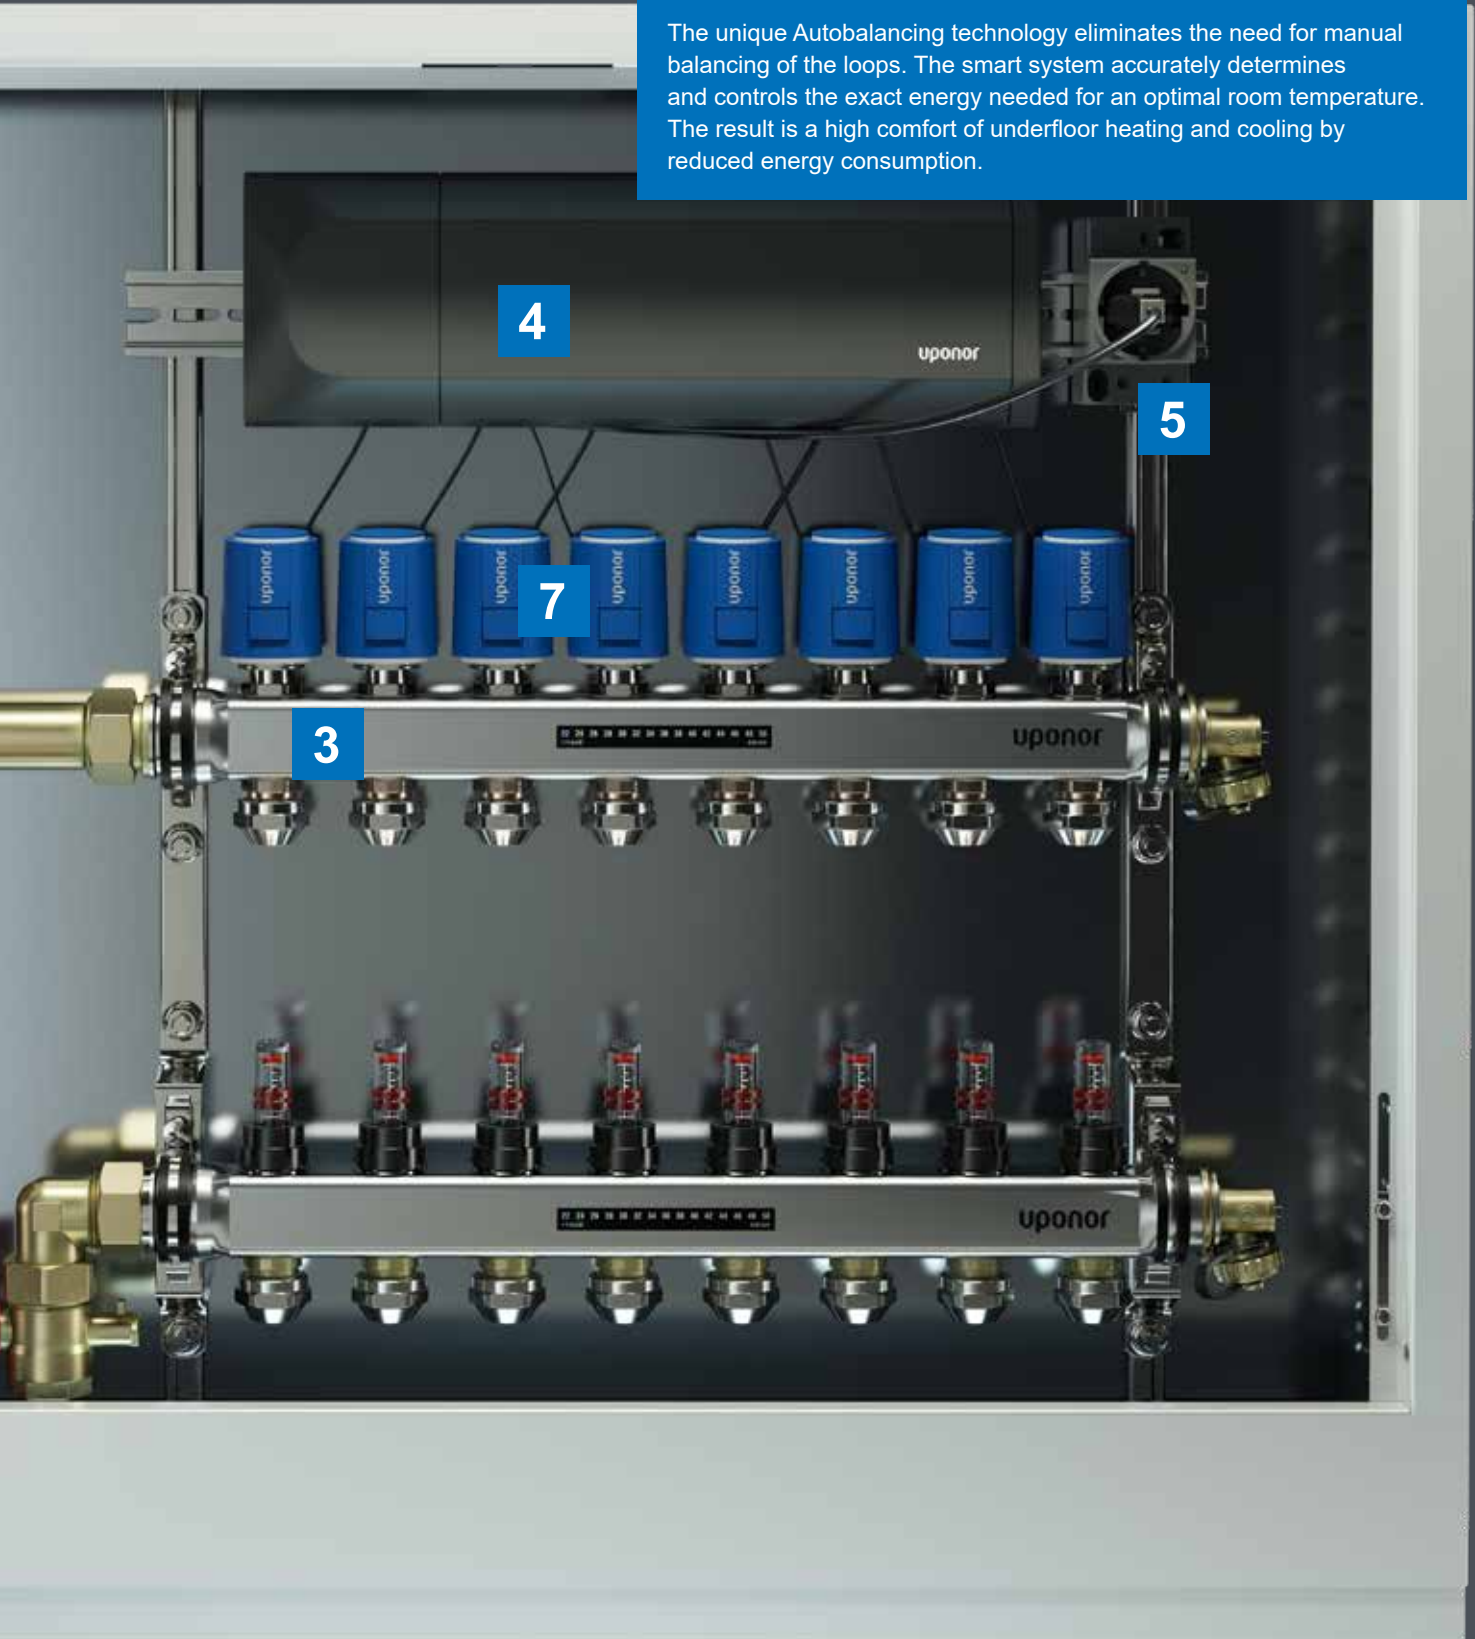

100% prefabricated and ready to install

Pre-wired Uponor Smatrix Controls including Autobalancing function

Smatrix is a fully equipped control system for radiant heating and cooling with supply temperature control as function of room temperature.

The unique Autobalancing technology eliminates the need for manual balancing of the loops. The smart system accurately determines and controls the exact energy needed for an optimal room temperature. The result is a high comfort of underfloor heating and cooling by reduced energy consumption.

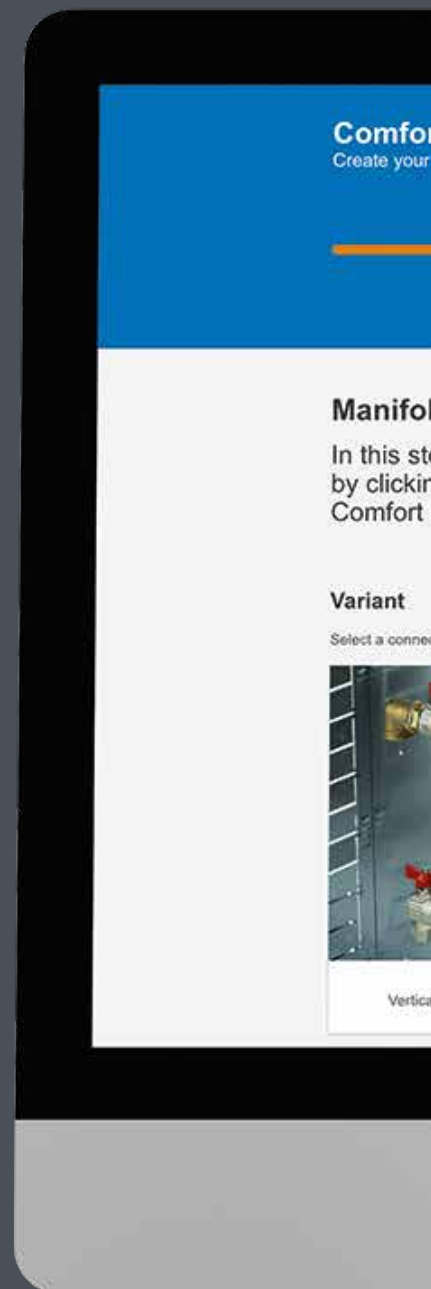

Uponor Configurator – individually equipped product in few steps

The preassembled underfloor heating manifolds can be easily configured online according to any customer requirements.

Uponor Comfort Port Configurator is the convenient order process that guides you through the assembly process where no parameter can be forgotten. Each delivery package is marked with exact details of your construction site.

The delivery takes place with the appropriate marking directly in protective packaging suitable for the construction site.
