

GENERAL CONDITIONS OF WORK OF THE SERVICING GROUP OF

UPONOR INFRA Sp. z o.o.

Installation of Vip-liner module

1. The Client shall appoint a person responsible for contact with the servicing group at the building site and will ensure the presence of that person at the place of installation during the performance of the works.
2. The Client shall ensure the preparation of the renovated collector according to chapter I of the enclosed description.
3. The Client shall provide a prepared place of assembly and free of charge additional equipment necessary for the execution of correct connection, specifically:
 - a) a tent and air heaters in the case of making the connections in minus temperatures,
 - b) the Client is responsible for the shutdown of the collector and if possible for the drying of the chamber (well) at the place of performance of the works before the planned arrival of the servicing group and during the works.
4. The Client undertakes to appropriately prepare and protect the chamber (well) according to the rules of occupational health and safety for the purpose of safe execution of the works during the laying and installation of the pipes, wells etc.
In the case of occurrence of a work accident because of the inappropriate preparation of the chamber in accordance with the applicable occupational health and safety regulations, the Client will be fully liable for such incident.
5. The Client acknowledges that Uponor Infra Sp. z o. o. is responsible for the quality of the connections made exclusively by that company, i.e. when the employee of Uponor Infra Sp. z o. o. is the operator of the machine and when both connected elements are manufactured by Uponor Infra Sp. z o. o.

The failure to meet the aforementioned conditions will prevent the efficient execution of the service by the servicing group and will result in charging the Client with the additional costs of the arrival and shutdown.
