➤ **NEW** **140mm Ecoflex Thermo VIP**

Following the success of the Ecoflex Thermo VIP (Vacuum Insulated Panel), we are delighted to introduce a new product within this range - the 140mm PEX pipe.

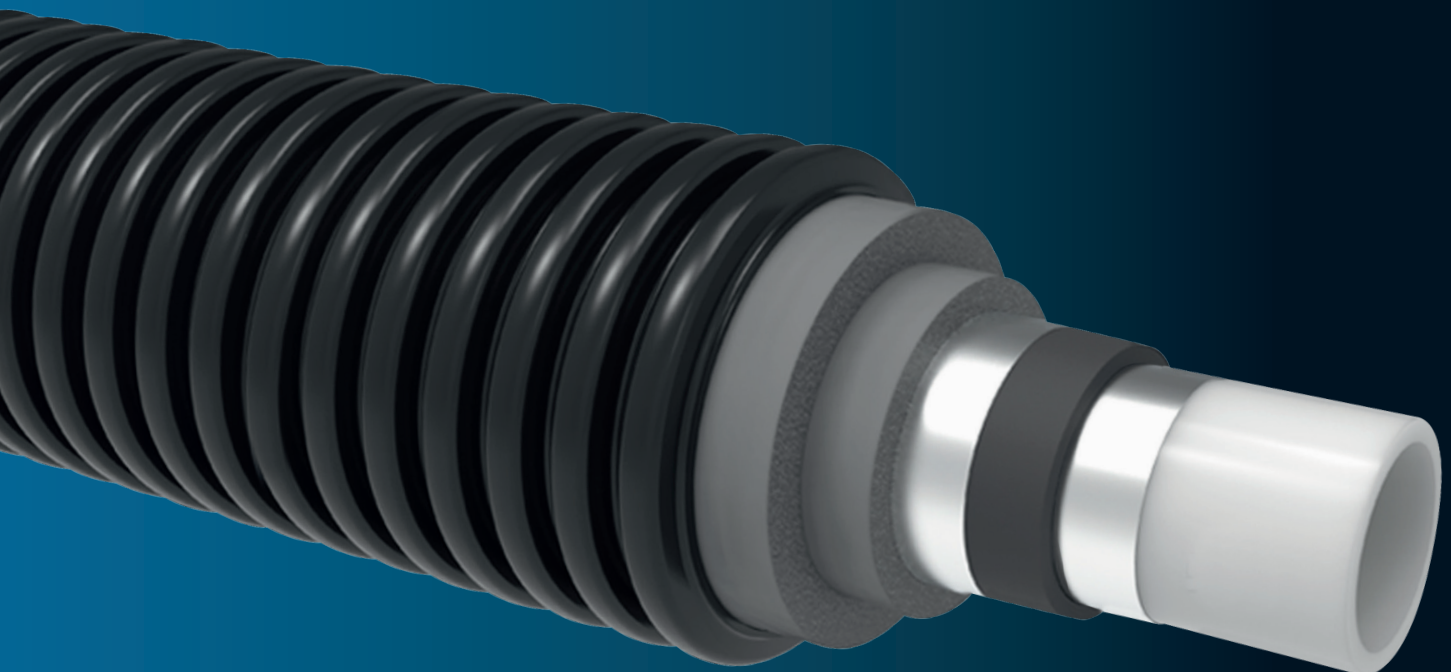

This new bigger pipe is ideal for large district heating projects where high-water volumes are required to meet the design specification.

The revolutionary VIP technology allows the system to benefit from a market-leading Lambda value (λ value) preventing heat and energy losses. Plus keeping the outer jacket size to a minimum makes for an easy installation.

This new 140mm pipe is compatible with all other Ecoflex Thermo and Ecoflex Thermo VIP product lines and can be connected using the popular Ecoflex Wipex connectors.

140mm Ecoflex Thermo VIP coils are available from stock in one continuous coil up to 100m. Coils can be cut to the required length and delivered direct to site.

Features

- Vacuum Insulated Panel insulation (VIP)
- Small diameter outer jacket
- 140mm PEX pipe with EVOH barrier
- Coil lengths up to 100m
- For use with Wipex connection range

Benefits

- Gives market leading low heat losses
- More flexible, lighter, and easier to install
- Suitable for high volume heating systems, both above and below ground
- No need for underground connections for installations up to 100m
- No special tools needed

Product code	Product Description	List Price
1121643	UPONOR ECOFLEX THERMO VIP SINGLE 140/200	£296.50 METRE
1121645	UPONOR ECOFLEX RUBBER END CAP 140/200	£110.50 EACH
1121647	UPONOR WIPEX COUPLING PN6 140X12.7 - R4"	£777.50 EACH
